[Description of the security update for SharePoint Foundation 2013: April 14, 2020 \(KB4484322\)](#)

This security update resolves the following issues:

- A cross-site-scripting (XSS) vulnerability that exists if Microsoft SharePoint Server does not correctly sanitize a specially crafted web request to an affected SharePoint server.
- A remote code execution vulnerability that exists in Microsoft SharePoint if the software fails to check the source markup of an application package.

[Description of the security update for SharePoint Enterprise Server 2013: April 14, 2020 \(KB4484308\)](#)

This security update resolves cross-site-scripting (XSS) vulnerabilities that exist if Microsoft SharePoint Server does not correctly sanitize a specially crafted web request to an affected SharePoint server. To learn more about these vulnerabilities, see the following security advisories:

- [Microsoft Common Vulnerabilities and Exposures CVE-2020-0923](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2020-0926](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2020-0930](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2020-0931](#)

- [Microsoft Common Vulnerabilities and Exposures CVE-2020-0977](#)

Description of the security update for Project Server 2013: April 14, 2020 (KB4462153)

This security update resolves a cross-site-scripting (XSS) vulnerability that exists if Microsoft SharePoint Server does not correctly sanitize a specially crafted web request to an affected SharePoint server. To learn more about the vulnerability, see [Microsoft Common Vulnerabilities and Exposures CVE-2020-0954](#).

Description of the security update for SharePoint Foundation 2013: April 14, 2020 (KB4484321)

This security update resolves vulnerabilities in Microsoft Office that could allow remote code execution if a user opens a specially crafted Office file. To learn more about these vulnerabilities, see the following security advisories:

- [Microsoft Common Vulnerabilities and Exposures CVE-2020-0920](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2020-0923](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2020-0924](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2020-0925](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2020-0929](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2020-0931](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2020-0932](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2020-0933](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2020-0971](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2020-0972](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2020-0975](#)

Description of the security update for SharePoint Enterprise Server 2013: April 14, 2020 (KB4011584)

This security update resolves a remote code execution vulnerability that exists in Microsoft SharePoint when the software fails to check the source markup of an application package. To learn more about the vulnerability, see [Microsoft Common Vulnerabilities and Exposures CVE-2020-0931](#).

Description of the security update for SharePoint Foundation 2013: April 14, 2020 (KB4011581)

This security update resolves a spoofing vulnerability that exists if Microsoft SharePoint Server does not correctly sanitize a specially crafted web request to an affected SharePoint server. This update also resolves a cross-site-scripting (XSS) vulnerability that exists if

Microsoft SharePoint Server does not correctly sanitize a specially crafted web request to an affected SharePoint server.

To learn more about the vulnerabilities, see [Microsoft Common Vulnerabilities and Exposures CVE-2020-0976](#) and [Microsoft Common Vulnerabilities and Exposures CVE-2020-0978](#).

Description of the security update for SharePoint Enterprise Server 2013: April 14, 2020 (KB4484307)

This security update resolves a remote code execution vulnerability that exists in Microsoft Word software if it does not correctly handle objects in memory. To learn more about the vulnerability, see [Microsoft Common Vulnerabilities and Exposures CVE-2020-0980](#).

Description of the security update for SharePoint Enterprise Server 2016: April 14, 2020 (4484299)

This security update resolves remote code execution vulnerabilities that exists in Microsoft SharePoint if the software does not check the source markup of an application package. This update also resolves cross-site-scripting (XSS) vulnerabilities that exists if Microsoft SharePoint Server does not correctly sanitize a specially crafted web request to an affected SharePoint server.

To learn more about these vulnerabilities, see the following security advisories:

- [Microsoft Common Vulnerabilities and Exposures CVE-2020-0920](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2020-0923](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2020-0924](#)

- [Microsoft Common Vulnerabilities and Exposures CVE-2020-0980](#)

Description of the security update for SharePoint Enterprise Server 2016: April 14, 2020 (4484301)

This security update resolves a cross-site-scripting (XSS) vulnerability that exists if Microsoft SharePoint Server does not correctly sanitize a specially crafted web request to an affected SharePoint server. This update also resolves a remote code execution vulnerability that exists in Microsoft SharePoint if the software does not check the source markup of an application package. To learn more about the vulnerabilities, see [Microsoft Common Vulnerabilities and Exposures CVE-2020-0923](#) and [Microsoft Common Vulnerabilities and Exposures CVE-2020-0931](#).

Description of the security update for SharePoint Enterprise Server 2016: April 14, 2020 (4484299)

This security update resolves a cross-site-scripting (XSS) vulnerability that exists if Microsoft SharePoint Server does not correctly sanitize a specially crafted web request to an affected SharePoint server. This update also resolves a remote code execution vulnerability that exists in Microsoft SharePoint if the software does not check the source markup of an application package. To learn more about the vulnerabilities, see the following security advisories:

- [Microsoft Common Vulnerabilities and Exposures CVE-2020-0923](#)
