### Description of the security update for SharePoint Enterprise Server 2013: April 13, 2021 (KB4493170)

This security update resolves a Microsoft SharePoint denial-of-service attack vulnerability. To learn more about the vulnerability, see Microsoft Common Vulnerabilities and Exposures CVE-2021-28450.

### Description of the security update for SharePoint Enterprise Server 2016: April 13, 2021 (KB4504723)

This security update resolves a Microsoft Word remote code execution vulnerability. To learn more about the vulnerability, see Microsoft Common Vulnerabilities and Exposures CVE-2021-28453.

### Description of the security update for SharePoint Enterprise Server 2016: April 13, 2021 (KB4504719)

This security update resolves a Microsoft Word Remote Code Execution Vulnerability and SharePoint Denial of Service Update. To learn more about the vulnerabilities, see the following security advisories:

- [Microsoft Common Vulnerabilities and Exposures CVE-2021-28450](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2021-28453](#)

### Description of the security update for SharePoint Server 2019: April 13, 2021 (KB4504716)

This security update resolves a Word remote code execution vulnerability and SharePoint denial-of-service attack vulnerability. To learn more about these vulnerabilities, see the following security advisories:

- [Microsoft Common Vulnerabilities and Exposures CVE-2021-28450](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2021-28453](#)

## Improvements and fixes

This security update contains fixes for the following nonsecurity issues in SharePoint Server 2019:

- Fixes an issue in which some aria attributes aren't allowed for an elements role in the Start page of a SharePoint web application.
- Fixes an issue on the PDF document parser in which incorrect results are returned when you search PDF files by using keywords.
- Fixes the UpgradeDescriptionField warning that occurs in the logs when you upgrade non-English versions of SharePoint from SharePoint Server 2016 to SharePoint Server 2019.
- Fixes an issue in which the cursor isn't distinguishable in the Rich Text Enhanced Editor when users visit a page in classic UI by using Microsoft Edge or Google Chrome.
- Fixes an issue in which the document item's property isn't displayed correctly in the **Properties** panel in Word if the document name contains special characters.

This update also contains fixes for the following nonsecurity issues in SharePoint Server 2019. To fix these issues, you have to install [KB 4504715](#) together with this update.

- Fixes an issue in which the focus border is cropped on the "News" link in the "News" web part.
- Fixes an issue on the Search Result page in which the **Search** filter isn't defined by having a complementary landmark.
- Fixes an issue in which the focus can move to the non-interactive elements in a News Card on the Start page.
- Fixes an issue in which the focus on the Document page moves to the **New** button when the **View Options** menu is closed.
- Fixes an issue in the screen reader while it's in scan mode in which it reads out some hidden contents after the **Cancel** button is selected in the **Create Communication Site** pane.

This security update also contains fixes for the following nonsecurity issues in Project Server 2019:

- Deleting timesheets takes a long time.
- **Current Max. Units (%)** in Microsoft Project user settings is unexpectedly reset to 100 percent after it's saved through the client-side object model (CSOM) or UI.

## Known issue in this update

Issue

After you install this update, you can no longer delete list item attachments in the item detail panel.

## Status

Microsoft is investigating this issue and will post more information in this article when a fix becomes available.

## Workaround

To work around this issue, see [KB 5003294](#).

[Description of the security update for SharePoint Server 2019 Language Pack: April 13, 2021 \(KB4504715\)](#)

## Improvements and fixes

This update contains fixes for the following nonsecurity issues:

- Fixes an issue in which the focus border is cropped on the "News" link in the "News" web part.
- Fixes an issue on the **Search Result** page in which the **Search** filter isn't defined by having a complementary landmark.
- Fixes an issue in which the focus moves to the non-interactive elements in a News Card on the Start page.
- Fixes an issue on the Document page in which the focus moves to the **New** button when the **View Options** menu is closed.
- Fixes an issue in the screen reader while it's in scan mode in which it reads out some hidden contents after the **Cancel** button is selected in the **Create Communication Site** pane.

**Note:** To fix these issues, you have to install [KB 4504716](#) together with this update.
