#### Update for Microsoft SharePoint Enterprise Server 2013 (KB5001933)

This cumulative update package fixes the issues that are described in the following Microsoft Knowledge Base (KB) articles:

- [May 11, 2021, update for SharePoint Enterprise Server 2013 \(KB5001926\)](#)
- [Description of the security update for SharePoint Foundation 2013: May 11, 2021 \(KB5001935\)](#)

#### Description of the security update for SharePoint Foundation 2013: May 11, 2021 (KB5001935)

This security update resolves a Microsoft SharePoint Server remote code execution vulnerability, information disclosure vulnerability, and spoofing vulnerability, and Microsoft SharePoint remote code execution vulnerability and information disclosure vulnerability. To learn more about these vulnerabilities, see:

- [Microsoft Common Vulnerabilities and Exposures CVE-2021-26418](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2021-28474](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2021-28478](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2021-31171](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2021-31172](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2021-31173](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2021-31181](#)

#### Improvements and fixes

This security update contains fixes for the following nonsecurity issues:

- Fixes the incompatible issue that's caused by the deprecation of the showModalDialog API in modern browsers.

- Fixes an issue in which SharePoint Designer doesn't work well for the site that disables the wiki home page feature.

#### [May 11, 2021, update for SharePoint Enterprise Server 2013 \(KB5001926\)](#)

Improvements and fixes. This update contains security and reliability improvements.

#### [Description of the security update for SharePoint Enterprise Server 2016: May 11, 2021 \(KB5001917\)](#)

##### Summary

This security update resolves a Microsoft Word remote code execution vulnerability and SharePoint Denial of Service Update. To learn more about the vulnerabilities, see the following security advisories:

- [Microsoft Common Vulnerabilities and Exposures CVE-2021-26418](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2021-28474](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2021-28478](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2021-31171](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2021-31172](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2021-31173](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2021-31181](#)

##### Improvements and fixes

This update contains a fix for the following nonsecurity issue in SharePoint Server 2016:

- Fixes an issue in which SharePoint Designer doesn't work well on the site that disables the Wiki Home Page feature.

This update also contains a fix for the following nonsecurity issue in Project Server 2016:

- The **Export to Excel** function doesn't work for the **Capacity and Engagements Heatmap** view on the Capacity Planning page.

#### [Description of the security update for SharePoint Server 2019: May 11, 2021 \(KB5001916\)](#)

This security update resolves a Microsoft SharePoint Server remote code execution vulnerability and a Microsoft SharePoint spoofing vulnerability and information disclosure

vulnerability. To learn more about these vulnerabilities, see the following security advisories:

- [Microsoft Common Vulnerabilities and Exposures CVE-2021-26418](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2021-28474](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2021-28478](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2021-31171](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2021-31172](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2021-31173](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2021-31181](#)

## Improvements and fixes

This security update contains improvements and fixes for the following nonsecurity issues in SharePoint Server 2019:

- Adds the ability to update the SQL authentication account username and password when SharePoint uses Azure SQL Managed Instance. To do this, use the following script:
  - `$db = Get-SPDatabase databasename`
  - `$db.Username = "PlaceholderAccountName"`
  - `$db.Password = "PlaceholderPassword"`

\$db.Update()

- Fixes the issue that affects the file path limit of 260 characters for the site collection that's hosted in a web application that's configured with multiple authentication methods.
- Fixes an issue in which assigned badges don't render on discussions, in a My Membership web part, or a members list.
- Fixes an issue in which shared columns in a document set are unexpectedly synchronized to a contained folder after the folder is renamed.

This update also contains fixes for the following issues. To fix these issues, you have to install [KB 5001915](#) together with this update.

- Fixes an issue in which a link is still added even though you select **Cancel** on the **Add a link** page in the site Edit navigation pane.
- Fixes an issue in which the focus isn't clearly visible on an Activity list when high contrast mode is on.
- Fixes an issue in which you can't activate a submenu drop-down box in scan mode.
- Fixes an issue in which the Persona Component doesn't have the sufficient color contrast.
- Fixes an issue in which the focus doesn't go to the first interactive element of the submenu in the Documents recent activity feed pane.

- Fixes an issue in which attachments in a custom list can't be deleted.
- Fixes an issue in which timestamps of comments are displayed as a link.
- Fixes an issue in which the focus order is not correct on the Documents page in the Narrator scan mode.
- Fixes an issue in which the screen reader is not announcing sufficient information for the "about me" menu in the upper-right corner of a site.
- Fixes an issue in which the focus is not visible on the **Hide in SharePoint mobile app** checkbox in the **New link** dialog box.

This security update also contains a fix for the following nonsecurity issue in Microsoft Project Server 2019:

- After you run the `ExportWorkspaceltemsByDisplayName2019.sql` script from the General Data Protection Regulation (GDPR) for Project Server, you can't find the `OwnerUserClaimsAccount` field in the query results.

### [May 11, 2021, update for SharePoint Server 2019 Language Pack \(KB5001915\)](#)

Improvements and fixes

This update contains fixes for the following accessibility issues. To fix these issues, you have to install [KB 5001916](#) together with this update.

- Fixes an issue in which a link is still getting added when you select **Cancel** on the **Add a link** page in the site Edit navigation pane.

- Fixes an issue in which focus isn't clearly visible on an Activity list when high contrast mode is on.
- Fixes an issue in which you can't activate a submenu drop down box in scan mode.
- Fixes an issue in which the Persona Component doesn't have the sufficient color contrast.
- Fixes an issue in which focus doesn't go to the first interactive element of the submenu in the Documents recent activity feed pane.
- Fixes an issue in which attachments in a custom list can't be deleted.
- Fixes an issue in which timestamps of comments are displayed as link.
- Fixes an issue in which the focus order is not correct on the Documents page in the Narrator scan mode.
- Fixes an issue in which screen reader is not announcing sufficient information for the "about me" menu in the upper-right corner of a site.
- Fixes an issue in which the focus is not visible on the **Hide in SharePoint mobile app** checkbox in the **New link** dialog box.
