## Description of the security update for SharePoint Enterprise Server 2013: September 8, 2020 (KB4484515)

After you install this update, some SharePoint pages may not render, and may generate the following error message:

Web Part Error: A Web Part or Web Form Control on this Page cannot be displayed or imported. The type could not be found or it is not registered as safe.

## Description of the security update for SharePoint Enterprise Server 2013: September 8, 2020 (KB4484480)

This security update resolves a remote code execution vulnerability that exists in Microsoft Excel if the software does not check the source markup of an application package. To learn more about the vulnerability, see [Microsoft Common Vulnerabilities and Exposures CVE-2020-1210](#).

## Description of the security update for SharePoint Foundation 2013: September 8, 2020 (KB4484525)

### Summary

This security update resolves vulnerabilities in Microsoft Office that could allow remote code execution if a user opens a specially crafted Office file. To learn more about these vulnerabilities, see the following security advisories:

- [Microsoft Common Vulnerabilities and Exposures CVE-2020-1198](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2020-1200](#)

- [Microsoft Common Vulnerabilities and Exposures CVE-2020-1595](#)

## Description of the security update for SharePoint Enterprise Server 2013: September 8, 2020 (KB4484514)

This security update resolves a remote code execution vulnerability that exists in Microsoft Word if the software does not correctly handle objects in memory. To learn more about the vulnerability, see [Microsoft Common Vulnerabilities and Exposures CVE-2020-1218](#).

## Description of the security update for SharePoint Foundation 2013: September 8, 2020 (KB4484488)

This security update resolves vulnerabilities in Microsoft Office that could allow remote code execution if a user opens a specially crafted Office file. To learn more about these vulnerabilities, see [Microsoft Common Vulnerabilities and Exposures CVE-2020-1198](#) and [Microsoft Common Vulnerabilities and Exposures CVE-2020-1460](#).

## Description of the security update for SharePoint Enterprise Server 2013: September 8, 2020 (KB4484516)

This security update resolves a remote code execution vulnerability that exists in Microsoft Excel if the software does not correctly handle objects in memory. To learn more about the vulnerability, see [Microsoft Common Vulnerabilities and Exposures CVE-2020-1224](#).

## Description of the security update for SharePoint Enterprise Server 2016: September 8, 2020

This security update contains fixes for the following nonsecurity issues:

- Fixes an issue in which the "shared with other users" context menu in subfolders doesn't work in classic view.
- Fixes an issue in which a file is uploaded to the wrong folder in classic view of OneDrive for Business.

## Description of the security update for SharePoint Server 2019 Language Pack: September 8, 2020

This security update contains fixes for the following nonsecurity issues. To fix these issues completely, you have to install KB 4484505 together with this update.

- Fixes an issue in which the "shared with other users" context menu in subfolders doesn't work in classic view.
- Fixes an issue in which a file is uploaded to the wrong folder in classic view of OneDrive for Business.
- Fixes an issue in which Reply Rich Text Editor (RTE) textbox fields are identified by JAWS as "unlabeled" in Discussion Board.

- Fixes an issue in which images are identified as "undefined" by JAWS in Picture Library/Slides view.
- Fixes an issue in which a list view cannot auto-refresh after you upload a new folder to it.
- Fixes an issue in which a "Multiple Entries Matched" error occurs when you edit a ListItem that has a People column.
- Fixes an issue in which the Modern documents page appears blank when a new user first logs on.
- Fixes an issue in which the ellipses (...) menu to "Manage Access" appears only the second time you that you select Share.
- Fixes an issue in which the role of the Document control is incorrectly defined in Communication Site.
- Fixes an issue in which renaming the page title through the document information panel (DIP) doesn't take effect in the Title region.
- Fixes an issue in which the Shift+Tab keyboard shortcut to navigate the news sites list creates a keyboard trap.
- Fixes an issue in which Suggestion in Column filter pane of a document library web part isn't working in a subfolder.
- Fixes an issue in which the List web part doesn't display the Hyperlink or Picture column correctly in a Modern team site.

## Description of the security update for SharePoint Server 2019: September 8, 2020

This security update contains fixes for the following nonsecurity issues in SharePoint Server 2019:

- Fixes an issue in which restoring a Search service application that has Overwrite type from a full backup fails after the Search service application is deleted.
- Fixes an issue in which the URL redirection occurs to the root instead of the actual resource when a user logs in to SharePoint by using multiple authentication types, such as a Security Assertion Markup Language (SAML) token and a FedAuth cookie, at the same time.
- Fixes an issue in which multiple items are added to the list when you add a new item to a list and select **Save** multiple times on the Ribbon.
- Fixes a memory leak issue that occurs when you export a site.
- Fixes a potential memory leak.
- Fixes an issue in which multiple columns or rows can't be copied from Excel tables to the list in Quick Edit view.
- Fixes an issue in which the DocumentSharing.svc service is broken and users receive a "403 Access Denied" error message.

- Fixes an issue that generates a high CPU cost when you call search API on an extended web application.
- Fixes an issue in which the library setting that should force opening a document in Word is not honored in classic experience when you use browsers other than Internet Explorer or legacy Edge.

This security update also contains fixes for the following nonsecurity issues. To fix these issues completely, you have to install [KB 4484504](#) together with this update.

- Fixes an issue in which the "shared with other users" context menu in subfolders doesn't work in classic view.
- Fixes an issue in which a file is uploaded to the wrong folder in classic view of OneDrive for Business.
- Fixes an issue in which **Reply Rich Text Editor (RTE)** textbox fields are identified by JAWS as "unlabeled" in Discussion Board.
- Fixes an issue in which images are identified as "undefined" by JAWS in Picture Library/Slides view.
- Fixes an issue in which a list view cannot auto-refresh after you upload a new folder to it.
- Fixes an issue in which a "Multiple Entries Matched" error occurs when you edit a ListItem that has a **People** column.
- Fixes an issue in which the Modern documents page appear blank when a new user first logs on.
- Fixes an issue in which the ellipses (...) menu to "Manage Access" appears only the second time that you select **Share**.
- Fixes an issue in which the role of the **Document** control is incorrectly defined in Communication Site.
- Fixes an issue in which renaming the page title through the document information panel (DIP) doesn't take effect in the **Title** region.
- Fixes an issue in which the Shift+Tab keyboard shortcut to navigate the news sites list creates a keyboard trap.
- Fixes an issue in which **Suggestion** in the **Column** filter pane of a document library web part isn't working in a subfolder.
- Fixes an issue in which the List web part doesn't display the **Hyperlink or Picture** column correctly in a Modern team site.
