## Description of the security September 13, 2022, cumulative update for SharePoint Enterprise Server 2013 (KB5002264)

- Some Web Part Pages Web Service methods may be affected after you apply the September 2022 security update. For more information, see [Web Part Pages Web Service methods may be blocked after applying the September 2022 security update for SharePoint Server \(KB5017733\)](#).
- This security update introduces a change in SharePoint Server that will affect customers who use the Document Generation capability in Nintex Workflow. Nintex Workflow customers must take additional action after this security update is installed to make sure that workflows can be published and run. For more information, see <https://go.microsoft.com/fwlink/?LinkId=2206156>. For support for Nintex Workflow, contact Nintex.

This security update resolves a Microsoft SharePoint Server remote code execution vulnerability and Microsoft SharePoint remote code execution vulnerability. To learn more about the vulnerabilities, see the following security advisories:

- [Microsoft Common Vulnerabilities and Exposures CVE-2022-37961](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2022-38008](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2022-38009](#)
- [Microsoft Common Vulnerabilities and Exposures CVE-2022-35823](#)

## Description of the security update for SharePoint Enterprise Server 2016: September 13, 2022 (KB5002269)

- Some Web Part Pages Web Service methods may be affected after you apply the September 2022 security update. For more information, see [Web Part Pages Web Service methods may be blocked after applying the September 2022 security update for SharePoint Server \(KB5017733\)](#).
- Some SharePoint 2010 workflow scenarios may be blocked. For more information, see [SharePoint 2010 workflows may be blocked by enhanced security policy \(KB5017760\)](#).
- This security update introduces a change in SharePoint Server that will affect customers who use the Document Generation capability in Nintex Workflow. Nintex Workflow customers must take additional action after this security update is installed to make sure that workflows can be published and run. For more information, see <https://go.microsoft.com/fwlink/?LinkId=2206156>. For support for Nintex Workflow, contact Nintex.

## Description of the security update for SharePoint Server 2019 Language Pack: September 13, 2022 (KB5002257)

This security update adds a new feature for SharePoint Server 2019 End of Support Notification.

This security update also contains fixes for the following nonsecurity issues in SharePoint Server 2019 Language Pack.

- Fixes an issue in which you cannot rename a file or folder if the URL contains double-byte characters.
- Fixes an issue in which the left navigation pane or the Quick Launch menu is missing because of missing "version hash" for JavaScript files.
- Fixes an issue in which the web part renders incorrectly because of lazy loading in modern pages.
- Fixes an issue in which you cannot set list item properties after you replace a document of the same name.
- Fixes an issue in which the "people" column (for the **Person or Group** column type) displays the User ID instead of the name if any required fields are not filled.

Known issues in this update

- Some Web Part Pages Web Service methods may be affected after you apply the September 2022 security update. For more information, see [Web Part Pages Web Service methods may be blocked after applying the September 2022 security update for SharePoint Server \(KB5017733\)](#).
- This security update introduces a change in SharePoint Server that will affect customers who use the Document Generation capability in Nintex Workflow. Nintex Workflow customers must take additional action after this security update is installed to make sure that workflows can be published and run. For more information, see <https://go.microsoft.com/fwlink/?LinkId=2206156>. For support for Nintex Workflow, contact Nintex.

## Description of the security update for SharePoint Server 2019: September 13, 2022 (KB5002258)

Improvements and fixes

This security update contains a fix for the following nonsecurity issue in SharePoint Server 2019:

- Fixes an issue in which the Language Detection feature uses the wrong hint during content processing.

This security update also contains an improvement and fixes the following nonsecurity issues. To enable the new feature and fix these issues completely, you have to install [KB 5002257](#) together with this update.

- Adds a new feature for SharePoint Server 2019 End of Support Notification.
- Fixes an issue in which you cannot rename a file or folder if the URL contains double-byte characters.
- Fixes an issue in which the left navigation pane or the Quick Launch menu is missing because of missing "version hash" for JavaScript files.
- Fixes an issue in which the web part renders incorrectly because of lazy loading in modern pages.
- Fixes an issue in which you cannot set list item properties after you replace a document of the same name.
- Fixes an issue in which the "people" column (for the **Person or Group** column type) displays the User ID instead of the name if any required fields are not filled.

This security update also contains a fix in Project Server:

- Fixes an issue in which you may not be able to update resources by using the client-side object model (CSOM) if a remote event handler is attached to a resource event, such as Resource Changing.

#### Known issues in this update

- Some Web Part Pages Web Service methods may be affected after you apply the September 2022 security update. For more information, see [Web Part Pages Web Service methods may be blocked after applying the September 2022 security update for SharePoint Server \(KB5017733\)](#).
- Some SharePoint 2010 workflow scenarios may be blocked. For more information, see [SharePoint 2010 workflows may be blocked by enhanced security policy \(KB5017760\)](#).
- This security update introduces a change in SharePoint Server that will affect customers who use the Document Generation capability in Nintex Workflow. Nintex Workflow customers must take additional action after this security update is installed to make sure that workflows can be published and run.
